CONTENTS

Kinetics of thermal decomposition of the tetracyano complexes of some transition metals containing the $[R_3S]^+$ cation
K. Györyová and J. Skoršepa (Košice, Czechoslovakia) 1

VALTER, a computing program for automatic thermometric titrations
V. Cerdá, M.T. Oms, A. Alvarez-Ossorio, X. Lumbiarres, R. Forteza (Palma de Mallorca, Spain) and G. Ramis (Valencia, Spain) 9

A comparative study of a kinetic–thermometric method and the atomic absorption cold vapour technique for determination of mercury traces and ultratraces
M.D. Mateo, R. Forteza, V. Cerdá (Palma de Mallorca, Spain), M. Baucells, G. Lacort and M. Roura (Barcelona, Spain) 21

The thermodynamic properties of cesium metaborate $CsBO_2$ from 5 to 1000 K
E.H.P. Cordfunke, R.J.M. Konings (Petten, The Netherlands) and E.F. Westrum, Jr. (Ann Arbor, MI, U.S.A.) 31

A new parameter to evaluate nucleation in glasses from DTA curves
F. Branda, A. Marotta and A. Buri (Naples, Italy) 39

Use of the "shape factors" as an empirical method to determine the actual characteristic temperatures of binary phase diagrams by differential scanning calorimetry
R. Courchinoux, N.B. Chanh, Y. Haget (Bordeaux, France), E. Tauler and M.A. Cuevas-Diarte (Barcelona, Spain) 45

Thermal decomposition of the malato-aquo complex of thallium(III): the mechanism of thermal dehydration of thallium(II) malate trihydrate
P.V. Khadikar and N.S. Sapre (Indore, India) 55

Interpretation of the dependence of the effective values of kinetic parameters on the degree of transformation
S.V. Vyazovkin and A.I. Lesnikovich (Minsk, U.S.S.R.) 69

The behaviour of some cobalt, nickel and copper amino acid complexes at different temperatures
M.S. Masoud, B.A. Abdel-Nabby (Alexandria, Egypt), E.M. Soliman and O.H. Abdel-Hamid (Minia, Egypt) 75

Thermodynamic and spectrophotometric studies of acetoacetanilidehydrazone complexes of Cu(II), Ni(II) and Co(II) metal ions
M.S. Abdel Moez, B.A. El-Shetary, M.F. Eid and F.I. Zidan (Cairo, Egypt) 81

Vapour–liquid equilibrium and solid–liquid equilibrium in the system formed by 1-octanol and n-octane
Z. Plesnar, P. Gierycz and A. Bylicki (Warsaw, Poland) 93

Theoretical contribution of solvation of AgBr in some organic solvents at 25 °C
E.A. Gomaa (Salālah, Oman) 99

Comparative study of the redox reactions between iodine and phenol derivatives, through correlation between thermal analysis and thermodynamic calculations from kinetic data
M.A. Zayed and F.A. Nour El-Dien (Giza, Egypt) 105

Mass spectral studies on the thermal desorption of aliphatic amines from the surface of Y-type zeolites
R.V. Jasra, B.D. Bhatt, V.N. Garg and S.G.T. Bhat (Vadodara, India) 115

Thermal analysis of some cyano compounds. Part II. Thermal behaviour of mixed $KLnFe(CN)_6 \cdot 4H_2O$ (Ln = La(III), Ce(III), Nd(III))
D. De Marco (Messina, Italy) 127

Kinetic study of thermal degradation of guar gum esters
S.P. Patel, R.G. Patel and V.S. Patel (Gujarat, India) 141

Kinetics of thermal degradation of cured epoxy resins based on triglycidyl-*p*-aminophenol
R.D. Patel, R.G. Patel and V.S. Patel (Gujarat, India) 149

Thermodynamic and kinetic consequences of isomeric interplay
Z. Slanina (Sapporo, Japan) 157
Thermal degradation of transition metal carbonyl complexes. Part III. Thermogravimetric and differential scanning calorimetric studies of triphenylphosphine pentacarbonyls of chromium, molybdenum and tungsten
T.S.A. Hor, H.S.O. Chan, C.S.M. Chiam and Kok Hwa Lim (Kent Ridge, Singapore) 175
Analysis of irreversible complex chemical reactions and some observations on their overall activation energy
R.K. Agrawal (Irwin, PA, U.S.A.) 185
Thermodynamics of binary mixtures of alkanone–chloroalkane. I. Heat of mixing of n-alkanone–1-chlorohexadecane mixtures at 298.15 K
I. García, J.C. Cobos, J.A. González and C. Casanova (Valladolid, Spain) 209
Designed experiment for polyethylene crystallization by DSC
D.L. Wilfong and K.D. Kotnour (St. Paul, MN, U.S.A.) 215
Thermal decomposition of solid complexes of cadmium chloride with substituted pyridines
Y. Masuda, T. Suzuki, T. Yamada and K. Sawada (Niigata, Japan) 225
Activation energy studies on complexes of uranyl fluoride with amidic ligands
P.A.B. Carstens, T.P. Knoetze and C.P.J. van Vuuren (Pretoria, South Africa) 237
Quasi-static study of the glass transition of glycerol by DSC
P. Claudy, J.C. Commerçon and J.M. Létoffé (Villeurbanne, France) 251
Complexing ability of pesticides and related compounds. Thermodynamic parameters for the formation of H^+, Na^+ and Ca^{2+} complexes with 2,4-dichlorophenoxyacetate in aqueous solution at different temperatures and ionic strengths
A. Casale, A. De Robertis and C. De Stefano (Messina, Italy) 261
Biological thermodynamic data for the calibration of differential scanning calorimeters: heat capacity data on the unfolding transition of ribonuclease A in solution
F.P. Schwarz and W.H. Kirchhoff (Gaithersburg, MD, U.S.A.) 267

Notes
Estimation of the pre-exponential factor in the isoconversional calculation of effective kinetic parameters
S.V. Vyazovkin and A.I. Lesnikovich (Minsk, U.S.S.R.) 297
Thermogravimetric studies on the addition compounds of cobalt and nickel dithiophosphinates with picolines and acetylpyridines
R.N. Mukherjee, S. Shankar and B.B.S. Shastri (Bombay, India) 301
Solid-state hydrolysis of iron(II) sulphate heptahydrate
S. Mahapatra and T.P. Prasad (Bhubaneswar, India) 305
The thermal decomposition of nagyagite
I.L. Botto and I.B.A. Schalamuk (La Plata, Argentina) 311
